

Comments re NP presentation - Remarks re administration/presentation

Very useful display but some of the maps needed keys & explanations. Thank you

You should have kept a register of people attending, otherwise your comments could be biased by people (or development companies) from outside the parish! Also 1 comment sheet per attendee – otherwise bias again.

Please conduct all your meetings in public and enhance your website so it is up to date. There needs to be transparency in the whole process.

Maps were unclear.

Developers should NOT be present selling their sites. The Parish Council should assess site against planning criteria and put forward only sites that meet the criteria.

Why hasn't the Parish Council established what residents want in terms of type of housing etc. by carrying out community surveys.

Well done for organizing this event. Very informative.

I am very annoyed that 2 development companies have been invited to 'sell' their companies to the village. How are we supposed to make an objective decision when faced with biased, money making presentations!

Meetings in private with developers is very unwise. They should happen in public otherwise

I wish to express my dismay that property developers were allowed to 'sell' their proposals at your Exhibition, it does not permit residents to have OBJECTIVE UNINFLUENCED views on the N.P.

Insufficient stocks of Nick Herbert's letter 7/11 available

Who is doing a sustainability appraisal of each site? Need next meeting with this done & fewer sites narrowed down.

Great display but some of the maps lack 'keys'

It seems that the Walberton PC/NP might well decide to sacrifice Fontwell – its 'poor relation' to development. Not Happy !

Excellent exhibition full of interesting facts and figures. Well Done !

How can any decisions be made until we know the route of the A27 and A29 ?

Don't fall into the hands of a developer who wants to build a big estate of expensive houses

Community Spirit: – A wonderful event with clearly a strong Village Community there. Well done

The exhibition was first class but tended to cover too many issues.

No advance warning in the villages of the meeting to discuss the Solar farm – heard on Spirit FM on day of meeting so could not attend!

Far too much info presented could not possibly read or understand it all.

I applaud the hard work that has been put into this exhibition but object to the heavy involvement of Hanbury.

A very good show, almost too many ideas to sort out! But very helpful.
